Skills

Languages: C/C++, Java, Python, JavaScript, TypeScript, SQL

Technologies & Tools: HTML, CSS, JavaScript, Basic Full Stack Development , Data Structures & Algorithms, Operating Systems, Software Engineering, Database Management Systems , Blockchain Basics, Cloud Computing Fundamentals, Generative AI, Machine Learning (Basics) , Git, GitHub, VS Code .

Academic Projects

1. Jhansi Ki Rani – A Ride for Freedom (Computer Graphics & Gaming Project)

- Designed and developed a story-driven game inspired by Indian history and cultural heritage.
- Implemented game logic, player state transitions, controls, and combat mechanics.
- Focused on narrative-based gameplay, translating historical events into interactive experiences.

2. AI-Based Smart Farming Platform

- Built a farmer-centric web platform integrating AI and database technologies.
- Features include crop recommendation, weather forecasting, and market price prediction.
- Implemented weed detection using CNN for field image analysis.
- Developed a multilingual chatbot using Dialog flow for farmer assistance.
- Used MongoDB for secure and scalable data storage.

3. Milk Quality Prediction:

Built a regression model using Python libraries (Pandas ,Scikit-learn) with 85% accuracy in analysing milk quality.

Field, Industry & Community Exposure

1. Industrial Electrical Safety Audit – MIDC, Pimpri-Chinchwad

- Conducted on-site inspection of electrical wiring, control panels, earthing, and safety systems.
- Gained exposure to real-world industrial safety standards, compliance checks, and risk assessment.

2. Community Engagement Project (CEP – Field Project)

- Worked on technology-driven solutions for community benefit.
- Developed teamwork, communication, and problem-solving skills through field interaction.

Hackathons, Teaching & Leadership Experience

1. TechXplore – National Level Tech Project Competition 2025

- Represented PCCOE, Pune at a national-level technical competition.
- Project shortlisted for Round 2, secured Rank 17 among teams across India.
- Gained exposure to real-world innovation, expert feedback, and competitive problem-solving.

2. Hands-on Workshop: Pandas & NumPy

- Conducted a practical workshop for second-year engineering students.
- Covered Python basics to mid-advanced concepts in Pandas and NumPy.
- Explained data manipulation concepts using real-world examples.

Education

PCCOE Pune

May 2023 – May 2027

Btech in Computer Engineering (Regional Language)

CGPA: 8.25

Relevant Coursework: Operating Systems, Design and Analysis of Algorithms, Software Engineering, Full Stack Development, Database Management Systems, Advanced Data Structures, Machine Learning (Basics), Generative AI Applications, Computer Graphics and Gaming, Blockchain Technology, Cloud Computing, Computational Techniques, Project Management (EEM), Professional Development Training

Certifications

- DBMS Basics Certification – Simplilearn
- “Finding Leader in You” Certified
